<b>Objectives and description of the action</b>
---

**Leonardo da Vinci Multilateral Projects 'Development of Innovation'** are transnational co-operation projects that aim to improve the quality of training systems through the development of innovative contents, methods and procedures within Vocational Education and Training (VET). Innovation is a matter of doing new things or finding new ways of doing familiar things. For Development of Innovation Projects it means that something new is developed (contents, methods, procedures etc.) as the end result of the project. A new solution to help several countries to cope with a common challenge in the VET area for which there does not yet exist an answer.

These projects must be the vehicle for improving quality and for promoting innovation in vocational training. Both aims should be integrated in the proposal in such a way that tools, methods or concepts, and also concrete materials which are developed during the project can be used in, or adapted for, changing environments.

The principles for the implementation of Leonardo da Vinci Development of Innovation projects are given below:

- Community support is intended for the production of tangible materials, products, methods and approaches in the field of [vocational training](#) and [guidance](#), and not for training activities as such
- Proposals must put the innovative dimension of the project in context and in relation to the needs of the target groups or the problem to be solved
- The development of innovation may apply equally to institutional contexts and to formal, informal or non-formal practices, as well to initiatives promoted at the local, regional or sectoral level
- Maximum benefit must be drawn at European level from the results by making use of the expertise and experience of the various European bodies and/or other qualified organisations active in this field
- In order to make best use of the results and obtain feedback enabling the product, material, approach or method to be adapted and transferred, [valorisation](#) (= dissemination and exploitation of results) must be an integral part of the project's work programme
- in disseminating and exploiting the results of projects, the [European dimension](#) must be enhanced by making vocational training and guidance materials, products, methods and approaches available, where possible, in the languages of all partners
